COBRA 

Made in England

Our new sturdy all terrain golf buggy. The Cobra has been designed to fit into most modern hatchback cars without and dismantling.

Made in both a 27" and 30" wheelbase which allows the buggy to fit through most doorways and gates  
**£2595--**

Classic 

Made in England

The Classic golf buggy design was our first and is still one of our most popular buggies.

Having a wider 36" wheelbase this buggy offers increased stability for the more demanding golf courses. It is also 4" shorter in length, which can help where space is at a premium in the vehicle.

**£2795**

### Senior Pro

This single seat buggy comes complete with full canopy and is designed for golf course hire and golfers with a trailer or somewhere to leave the buggy at their club.

It's design is based on the conventional twin seater model but has a single seat. **£3600**

Weatherproof cover for **£400**  
Golf club cover for an extra **£150**

*NOTE: We are now able to supply lightweight folding aluminium ramps*

**All Specifications Subject to Change Without Notice**

The Grasshopper Golf Buggy is at the forefront of single seated machines on the market today. Its visual appearance is pleasing to the eye and is supported by the excellent quality of its design and build. Both our Junior and Classic models where designed in the UK and are handbuilt to the highest standard in our Nottinghamshire factory.

Since our first buggy back in 1992, we have strived to continually refine and improve our designs; this culminated with the introduction in 2008 of two new models the 'Classic SE' and the 'Junior SE'. The SE Range incorporated many body styling changes, including the introduction of our stylish 'Cobra Snake Head Tiller' this design of tiller uniquely positions all the controls and indicator lights conveniently in front of the driver, allowing easy access to the power switch, fine speed control, forward reverse switch and battery charge indicator.

We have now further refined our tiller design with a small but significant change to the handlebars. This new design of handlebar gives a more natural and comfortable seating position, this in turn (excuse the pun) improves the response of the steering, the slightly longer handlebars reducing the effort required to turn the wheels.

Red, Blue, White & Green are standard  
Black £100 extra special edition

"The design allows the buggy to fit into the smallest of family hatchbacks with no tools for dismantling, in less than a minute"

Visit [www.grass-hopper.co.uk](http://www.grass-hopper.co.uk) - and view a short video demonstrating how

With the use of a set of ramps and the removal of the buggy seat, our Junior and Classic buggies can be driven into the back of many family sized hatchbacks and estates. In the case of the Senior Pro, GrasshopperLeisure Karts produce a purpose built trailer for towing if required.

If your vehicle is not a hatchback or estate, the design allows the buggy to be taken apart very easily and the component parts will fit into most car boots.
